

SAMPLE BLISTER PACKS

Examples of Pharmacy Blister Packs of Daily/Scheduled Medications

Please ensure that blister packs include:

- camper's name
- medication name
- dose and strength
- schedule for administering

If **more than one medication** is scheduled to be taken at the same time of day, those medications should be blister-packed in the same "bubble". Please ensure that each medication is clearly labeled on the pack.

Examples of Daily/Scheduled Medications that are Blister Packed by Doses in Original Packaging

Some medications (e.g. ADHD, birth control) are already blister-packed by dose in their original packaging. These medications do not need to be re-packed into new blister packs.
